

## 0.5 Programmer Position @ Mobile & Cloud Lab

Posted on: 12<sup>th</sup> September 2017

Mobile and Cloud Lab is offering a 0.5 programmer position for a student. The programmer will be mainly helping in implementing and testing Fog computing methods for Cloud-centric Internet of Things system.

We are primarily looking for a student who can have long commitment with the project and probably would write his/her master thesis with the group.

We are searching for students with the following profile:

- Good academic background.
- Good programming skills (Android or iOS for mobile app; Java or Python for server-side)
- Strong interest in Fog computing and the Internet of Things system.

Applications will be accepted until 25<sup>th</sup> September 2017. Successful applicants are preferred to start in October 2017.
